Summary

I'm a Full-Stack Developer of web2 and web3 with a bit of preference in Frontend development. I'm experienced with all stages of the development cycle for dynamic web development and in the creation of Decentralized apps projects and centralized projects. I'm quite knowledgeable in programming languages such as HTML5, CSS, JavaScript, Solidity, Next JS, and C# and I'm willing and eager to improve and learn more and more.

Projects

NFT AIR (Improved MemeForest): This is an Improved version of the memeForest Dapp, here I used different technologies with better UI, using Tailwind CSS, Next js, Ankr, Mumbai, The graph protocol, and web3.storage. People can upload the artwork here for people's interactions.

Meme Forest: This Project was done using two Technologies; Rainbow Kit(WAGMI Client), and Arweave(Bundlr) In creating a platform where members can put up memes for others to view. Like, Star and download.

Tunify (Spotify Dapp): (HackThe Mountain 3.0 project)

Some Of My Other Little projects:

MemeForest, Simple Voting DAO System, Oleanji DAO, EXC DEX (Polygon Hackathon)
